

About Us

Fiera Private Debt is a leading Canadian manager of private debt for institutional investors. We provide debt financing to mid-market corporations and infrastructure projects across Canada and the US.

Our seasoned team of professionals is renowned for its expertise in research, underwriting and loan origination combined with top-of-class governance and risk management to protect capital on behalf of its investors while delivering attractive returns.

The investment selection process is based on a rigorous analysis of investment opportunities to establish the creditworthiness of the borrower and to determine the appropriate loan structure and covenants to protect investor capital as well as maximize returns.

Our investment approach is highly disciplined and credit-driven with an unwavering focus on proactive portfolio management. Investments are managed on a team basis with shared responsibility for credit quality, portfolio management and the creation of returns for our investors.

As a result of our focus on direct lending and our preference to be the sole lender, we have greater control over the investment and a direct relationship with borrower management. This investment approach of “pure” direct lending contributes to our success in consistently achieving our target returns and minimal loan losses.

Benefits of Private Debt

- ✓ Superior returns due to complexity and illiquidity premium
- ✓ Lower risk profile resulting from stronger covenants, collateral and proactive loan management
- ✓ Predictable monthly income
- ✓ Diversification across industry sectors and geographic regions
- ✓ Lower correlation to public market returns
